Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://webapp.etsi.org/IPR/home.asp>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Foreword

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities, UMTS identities or GSM identities. These should be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between GSM, UMTS, 3GPP and ETSI identities can be found under <http://webapp.etsi.org/key/queryform.asp>.

Foreword

This Technical Specification has been produced by the 3rd Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
 - 1 presented to TSG for information;
 - 2 presented to TSG for approval;
 - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

1 Scope

The present document identifies the 3GPP Technical Specifications and Technical Reports specifically relating to the IP Multimedia Subsystem (IMS), and which are common to all systems based on IMS.

2 References

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document *in the same Release as the present document*.

[2] 3GPP TR 21.900: "Technical specification group working methods"

3 Definitions, symbols and abbreviations

3.1 Definitions

For the purposes of the present document, the terms and definitions given in TR 21.905 [1] apply.

3.2 Symbols

(None)

3.3 Abbreviations

For the purposes of the present document, the abbreviations given in TR 21.905 [1] and the following apply. An abbreviation defined in the present document takes precedence over the definition of the same abbreviation, if any, in TR 21.905 [1].

NGN	Next Generation Network
R1	Release 1
R2	Release 2
TISPAN	Telecommunications and Internet converged Services and Protocols for Advanced Networks

4 General

The numbering scheme for specifications is described in 3GPP TR 21.900 [2].

5 Specifications and Reports

NOTE 1: The "for publication?" column of the table below indicates whether or not the documents are intended for adoption by the partner Standards Development Organizations as their own publications. Those marked "no" are internal working documents of the 3GPP TSGs.

NOTE 2: "Type" indicates Technical Specification (TS) or Technical Report (TR).

The table below contains all Common IMS specs pertaining to Release 8, not including those created to replicate existing frozen publications in the ETSI Technical Committee TISPAN Next Generation Network (NGN) Release 2 document set. These latter were created as ready-frozen Release 8 specs. Refer to annex A for their origin and future evolution. The new IMS specifications developed by 3GPP from Rel-8 onwards automatically fall under the Common IMS umbrella and hence are not listed in the table in annex X.

Tables are based on query " 2003-09-03_CmnIMS_specs_list_rel-x__21-202" in the [3GPP Specifications Status database](#).

Annex A (informative): Core IMS Specifications transferred from ETSI TISPAN to 3GPP

The information in the present annex originally appeared on the 3GPP web site at <http://www.3gpp.org/Fixed-network-core-IMS-mapping> and is reproduced here for the sake of comprehensibility of the relationship between NGN Releases 1 and 2 and the corresponding 3GPP TSs.

The table below shows the ETSI publications relating to core functions of the IP Multimedia Subsystem (IMS) used by the Next Generation Network standardized within ETSI Technical Committee Telecommunications and Internet converged Services and Protocols for Advanced Networking (TISPAN).

Because of different working methods between TISPAN and 3GPP, NGN Release 1 (R1) and Release 2 (R2) publications are transferred under separate 3GPP TS numbers.

EXAMPLE: 3GPP TS 23.404 (NGN Release 1) in 3GPP Release 7 becomes
3GPP TS 23.504 (NGN Release 2) in 3GPP Release 8.

Where further development is envisaged within the Rel-8 timeframe, a further number, 2x.6xx, has been allocated.

EXAMPLE: 3GPP TS 24.504 (NGN Release 2) in 3GPP Release 8 becomes
3GPP TS 24.604 (beyond NGN Release 2) in 3GPP Release 8 (and beyond).
TS 24.504 will not be continued in 3GPP Release 9 ff.

In general, TISPAN documents were transferred in an already-frozen state, and only essential maintenance is envisaged on the 3GPP 2x.4xx and 2x.5xx TSs.

- Light green: need new spec to continue work within Rel-8 time frame?
- Salmon: conversion done, 3GPP spec available
- Yellow: conversion proposed (3GPP number not yet allocated)

Note 1:	If no R2, use R1; no separate 3GPP Spec number required. First instance transferred to 3GPP is 2x.4aa where aa is the same as the last two digits of the TISPAN parent publication. Where no R2 exists, R1 document is transferred to Rel-7, and is immediately approved and frozen. Version 7.0.0 is then immediately upgraded to Rel-8 (v8.0.0) unchanged. All transferred specs with one exception: see note 5) are immediately frozen after transfer, at both Rel-7 and Rel-8. (A few do not exist at Rel-7.)
Note 2:	Version in Italics = TISPAN not yet available for txfer (ie being processed towards ETSI publication at a higher version).
Note 3:	May be unnecessary to transfer this spec, since already superseded by 29.162. Nevertheless, CT3 decided to transfer to be on the safe side.
Note 4:	(deleted)
Note 5:	Not yet frozen at R2. therefore too early to create "post R2" 3GPP version; further development to take place within 24.503.
Note 6:	3GPP version numbers take over where TISPAN left off. Thus they do not necessarily abide by the rules of 21.900. The version number in each 3GPP Release is stepped up one "editorial" place from the TISPAN version number used as the basis.
Note 7:	For TISPAN endorsements, continuing development will take place within the original endorsed spec, so no new 2x.6xx spec is needed.
Note 8:	TS 181 002 not frozen at R2, so work continues in 22.173 (Rel-8).
Note 9:	The versions shown are for the first instance of the 3GPP spec concerned. Obviously these will be raised to v7.0.0 / 8.0.0 as soon as they are approved. There is no intention to maintain this page to show the most current version.
Note 10:	Some elements of original TISPAN document to be transferred, others to remain.

Annex M (informative): IMS related Specifications and Reports in 3GPP2

The table below shows the 3GPP2 publications relating to core functions of the IP Multimedia Subsystem (IMS) used by the 3GPP2. Also shown in the table is the mapping between the replaced 3GPP2 MMD specifications and the corresponding 3GPP IMS specifications which replace them and the final revision of the document that was published by 3GPP2.

3GPP2 Document Number and Revision	3GPP2 Document Title	3GPP Rel-8 TS/TR	3GPP WG

Annex C (informative): Change history

Change history							
Date	TSG #	TSG Doc.	CR	Rev	Subject/Comment	Old	New
2008-05					First draft based on SA1 request to SP-38, refined at SP-39. Spec list based on Specification Manager's whim.		0.0.0
2008-12					Update based on continuing evolution of Release 8 specs	0.0.0	0.1.0
2008-12	SP-42	SP-080724			Incorporation of comments from TSG CT: removal of §5.1 (substituted by two examples in annex A); indication in list of specs of those which do not progress beyond NGN R2 applicability.	0.1.0	0.2.0
2009-01					Update to specs list table resulting from further feedback; Correction to URL of TISPAN spec mapping following revamp of 3GPP web site	0.2.0	0.3.0
2009-03	CP-43	CP-090103			Presentation for information	0.3.0	1.0.0
2009-03	SP-43	SP-090035			Presentation to TSG for approval	1.0.0	1.1.0
2009-03	SP-43				Approved	1.1.0	8.0.0
2009-05	SP-44	SP-090463	2	2	Annex mapping 3GPP2 specs to 3GPP common IMS specs	8.0.0	
		SP-090464	3		Revise scope		8.1.0
